

Social Entrepreneurs Network (SEN)

Working together towards global sustainability

Businesses invariably produce waste, whether through production or unused capacity. But with limited resources on this planet, what if we could limit, re-direct that waste, or share that capacity with someone who can re-purpose it?

SEN is a global network of companies and partners that believe in creating a better future through a focus on sustainability. We will achieve this by actively connecting organisations who can mutually benefit from the sharing of resources and capacity, with the ultimate aim of creating closed loop supply chains.

Identify spare capacity or waste materials produced by your organisation and list with SEN

Connect with organisations or NFPs that can re-purpose or benefit from your waste / spare capacity

What's in it for you?

As a business, there needs to be a benefit to the bottom line. We get it. This network isn't about charity. It's about connecting people together who:

- > Creatively explore how waste materials can be re-purposed / re-sold to reduce your overheads and carbon footprint
- > Share and leverage spare capacity with other SEN partners
- > Explore new channels of supply as material inputs for your organisation

All with the ultimate outcome of increasing sustainability and reducing waste.

Join our network today to connect with others like you, who want to make a difference.
